RE: Backflow Assembly Test Due at 123 Center St, City, State, Zip

Dear Water Customer,

The State of Alabama requires backflow prevention assemblies be installed on all hazardous cross-connections to help keep our water supply safe. These assemblies must be tested and certified every year to ensure that they are working properly. Gulf Shores Utilities has partnered with BSI Online to assist in administering the backflow program in your community. Our records show the following backflow assembly(s) at your property, which are due to be tested by **February 1, 2025**.

Size	Manufacturer	Model	Serial Number	Hazard	Location
1”	Febco	860	H07692	Irrigation	NE corner

You are responsible for hiring a licensed backflow tester to perform the annual test and certification of the backflow assembly(s) listed above (BSI does not test backflow assemblies). Please provide the CCN listed in the top right corner of this letter to your backflow tester, as they will need this number to properly file your backflow test reports via BSI Online. You may also use this CCN at www.bsionline.com to verify when your backflow test has been filed, locate a list of testers in your area, or to simply learn more about backflow. Please contact BSI via e-mail (support@backflow.com) or phone (888-966-6050) if you have any questions. Thank you for your cooperation and for helping to protect our water resources.

Sincerely,

Christine Walsh, Vice President
Agent for Gulf Shores Utilities

For your convenience, your last testing company of record (if available) is listed below:

Ray’s Plumbing, LLC (432) 555-0123
